1. This application is in condition for allowance except for the presence of claims 1-23 to inventions non-elected without traverse. Accordingly, claims 1-23 been cancelled. All other claims as dependent on allowable claim 24 have been examined and are allowable as depending on an allowable claim.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 1-23.

In the second claim 25, "25" has been changed to --26--

In each claim 25-31, (including both occurrences of claim 25), "23 or" has been deleted.

The following is an examiner's statement of reasons for allowance: Primarily, the band wherein is fixed said at least one actuator at a second end and slidable attached to said isolator is not disclosed as suggested, in combination with the remaining elements such as the pressure plate nonconductive and movable, the pressure conduction composite and isolator disposed between said electrodes, said composite contacting said electrodes, said isolator, and said at least one pressure plate. That is, one could arguably consider 30 of Grosse-Wilde a band in Fig. 4, with 31 a nonconductive isolator, and 32 an actuator, and 11 the pressure conduction composite. However, there is no suggestion for the pressure plate to be movable, or the pressure conduction composite contacting said isolator and said one pressure plate or for the band slidable attached to said isolator, for example.
